A Message From The Chair

Winter is here and I am eager to get outside to enjoy this season.

The holidays can be hectic, and getting out into the woods is the perfect stress reliever. But be prepared for the cold and ice, dress in layers and keep traction devices at the ready. With the leaves off the trees, views are fantastic and the clear blue of the sky and the bright sun is something no one should miss. And hopefully this year we will see enough snow for snowshoeing!

You have heard this before but I would like to repeat it. Volunteers are the most important part of our chapter. With great pride I am happy to announce that Roy Wooters has volunteered to be our new Conservation Chair. We all know Roy as one of our newer hike leaders, and I am sure he will make a great addition to our board. Thank you Roy and all of our committee chairs who are dedicated to making our chapter successful.

Finally, I would like to wish everyone a Happy and Healthy New Year.

See you on the trails,
Karen

A Year of Hiking, Biking, Running and Skiing
by Diane and Allen Grunthal

The past year was an active one for the Grunthals, the first 12 months of Allen’s retirement. His bucket list is long. The only question was how to attack it.

We started in Colorado with three weeks of hiking on successively higher and higher mountains. To acclimatize properly, we started in Boulder at 6,200 feet above sea level and hiked nearby mountains in The Front Range. Then we drove to Rocky Mountain National Park where we hiked mountains of 9,000 to 11,000 feet. If all you do is drive the roads and stop at the lookouts, you will be astounded at the majestic scenery and wildlife viewing. But hiking the trails allows you to really experience the raw beauty of the park. Our final week in Colorado saw us summit Quandary Peak at 14,265 feet. Allen went on to summit 4 more peaks over 14,000 feet in the next 2 days, including 14,433’ Mt. Elbert, Colorado’s biggest mountain and the 2nd highest mountain in the continental U.S. Mountains taller than 14,000 feet in Colorado are known as 14ers. There is much less oxygen at this altitude, and your lungs gasp for breath at every step.

Next stop was skiing at Killington in Vermont, until it was time to leave in March. Then on to New Zealand for three weeks of hiking. We started with an exciting hike among volcanoes over the Tongariro Crossing in the North Island - hiking through Lord of the Rings filming sites. We continued to the South Island, then on to Stewart Island and one other small island, where the many flightless birds have no predators.

Allen had never before run a marathon, so he was long overdue. In April he trained hard and won first in his age group in the Lake George Half Marathon, his first half in 23 years. But this was only a tune-up for the main event, the hugely hilly Mad Marathon in July in the mountains of northern Vermont. Allen ran the full marathon and Diane ran the half, and much to the surprise of both of us, we each won first in our age groups. It was a special day for us. (continued on page 7)
HIKER’S GUIDE

RESPONSIBILITIES - Hikers with children under 16 and new hikers are required to contact the hike leader in advance to determine if the hike is suitable for them. Minors under 16 are welcome on day hikes when accompanied by a parent or guardian. No person under 18 shall participate in overnight outings unless accompanied by a parent or adult sponsor over 21. The hike leader may refuse to allow a person to hike who is judged to be poorly equipped or unable to do the published hike. Pets are not permitted on hikes unless the hike description clearly states that it is “dog friendly”. Non-members are welcome on two hikes after which ADK membership is required. Participants should get to the hike at least 10 minutes prior to the starting time.

RISKS - As with all physical activities, hiking involves hazards. Persons participate at their own risk and will be asked to sign a statement acknowledging that fact before starting the hike. Prior to the hike please advise the leader of any medical condition or physical liability that could affect you during the hike.

FOOTWEAR AND CLOTHING - Wear clothing suited to the weather and carry extra garments for unexpected weather conditions. Dress in thin layers so that you can adjust the number of layers as required to maintain comfort. In winter carry a wool cap and wool or polypropylene gloves or mitts and a windproof shell. Be prepared for rain. Bring a rain jacket and rain pants, preferably of the type that permits venting body moisture. Wear comfortable, sturdy boots. Do not wear cotton garments in winter.

DRINK AND FOOD - Adequate hydration is important year round. Drink frequently during the hike. Carry food to enjoy during the midday lunch stop.

DOG-FRIENDLY HIKES - All hikers with dogs must abide by park leash regulations.

HIKE RATINGS - represent the Pace, Distance and Terrain covered during the hike. A hike’s rating is determined by the hike leader.

PACE:  
A - fast - 2.5 mph or faster  
B - moderate - about 2 mph  
C - easy - 1.5 mph or less

DISTANCE: is given in miles as noted

TERRAIN:  
A - Strenuous, long ups and downs, some rock scrambling possible.  
B - Moderate ups and downs as occur typically in Harriman.  
C - Generally flat with little elevation change.

MAPS - The TC number indicates a NY-NJ Trail Conference map for the area of the hike. For example: TC-118 refers to the Southern Harriman Park map.

ABBREVIATIONS - NCA-No Calls After . . . , Pref.- Leader’s contact preference.

EXPENSE SHARING - When car-pooling, passengers are expected to offer the driver funds sufficient to cover the cost of fuel, tolls and parking fees. A $3.00 minimum per person is recommended. Most hike trailhead meeting locations can be found on NY-NJ Trail Conference maps.

HIKE CANCELLATION POLICY - Sometimes an illness, injury or other unforeseen problem will make it impossible for a hike leader to lead his/her hike as announced in the schedule. When this happens the leader should first try to find a substitute leader so the hike can proceed. The hike schedule chair person or any club officer can assist if necessary. If no substitute leader can be found then the leader or a substitute should appear at the hike meeting place to inform hikers of the situation. If a qualified leader volunteers, he/she should be given the sign-in sheet and the hike can proceed as scheduled. If the hike is one that requires preregistration, the leader must inform all who registered of the change by phone or e-mail.

ADK STICKERS

You can get an ADK sticker for your car windows by contacting Phyllis Key at pkeyhiker@gmail.com. There is NO charge. Be sure to include your name and address so they can be mailed to you!

Yoga for Hikers: Vrksasana, the classic Tree Pose
by Deanna Felicetta, RYT-E

Last issue, we learned about Rooted Tree. Vrkra means tree and Vrksasana means Tree Pose in its fullest expression. As hikers we have a great appreciation of trees. They push roots firmly into the earth. Their strong trunks support the tree and extend up toward the sun with branches and leaves. We will mimic nature as we perform Tree Pose.

We begin by standing alongside a wall, about an arm's length away. Our posture is that of Mountain Pose with our feet parallel and firmly grounded onto the earth. Engage each of your muscles in turn, beginning at your feet and extending your body upward to the sky. Breathe fully in and out as you stand tall. Bring your arms up alongside your head (by your ears) with palms facing inward. Breathe. Now take your right hand and place the palm on the wall about shoulder height. Press your right foot firmly into the floor and raise your left foot and place the curve of the sole of your foot against the calf of your leg. Your knee should point out to the side as much as is comfortable for you. Keep your hips level and square with your tail bone pointing down as you do this. Are you breathing? Relax here and bring your left arm upwards. If you feel stable remove your right hand from the wall and bring both hands over your head pressing palms together with fingertips pointing up. Hold for a few moments and breathe gently. Enjoy the airy, light stillness here. You are now among the treetops.

Step down and turn to the other side. Repeat Tree Pose with your left palm to the wall and your right foot pressing against the left calf. Bring your right hand upwards to the sky, and if you are secure allow your left hand to release from the wall and move to join the right over your head, pressing the palms together. Feel the breeze in the trees, and breathe gently for a few moments.

Notice that Vrksasana requires much focus and centering. It is a wonderful pose for improving balance and equilibrium. These are great qualities for a hiker. There is a great deal of energy used by the feet and body to create grounding to the earth. Legs are energized, as are the torso and spine. The spine is tall and chest open with a level head and eyes forward as you are among the trees. Repeat Tree Pose again on each side and if you want a further challenge raise your foot to your inner thigh an inch or two above the knee instead of your calf. This is a playful pose so enjoy it often.

I think you will find doing this pose of great benefit in the winter months ahead. Enjoy the Tree, and I hope to see you on the trail soon.

Namaste,
Deanna

A Year of Hiking, Biking, Running and Skiing
(continued from page 1)

In May we boated and biked the Cyclade Islands in the south of Greece. Greece is far more mountainous than we anticipated. Diane was very envious of the 40-something women in the group who were smart enough to have rented e-bikes (bikes with tiny battery operated motors) for the entire trip! Riding a bike with a motor is cheating, isn't it?

Our year ended as we journeyed to Austria for 2 weeks of hiking and biking, followed by 1 week of hiking in southern Germany. We highly recommend Austria for its dazzling, dramatic views of high mountain summits spotted with glaciers in flawless skies, and countless dedicated biking paths, mostly paved. Highlights included hiking up 3,000 vertical feet where jaw-dropping 360 degree views awaited us. The scenery could not have been more spectacular. Then we biked inn to inn. Finally, we climbed to the summit of Germany's highest mountain, the Zugspitze, where we had to negotiate near vertical mountain walls, ascending while clinging to iron ladders, chains and rungs bolted into the rocks. Definitely not for people who are frightened of heights.

Now we are on to Hawaii to hike and bike during the cold winter months before we return to Vermont for the ski season.

We feel very blessed and fortunate to be able to explore the world while exercising and improving our hiking skills.

Many thanks, hike leaders...
